The Abridged part 2 History of SEGA

Gulf and Western,
an American
conglomerate,
sold its North

GW

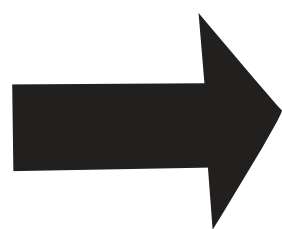

Gulf+Western

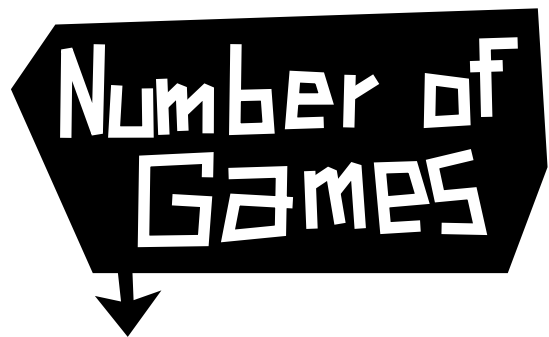

American arcade game
manufacturing division to
Bally in 1983. The next year
David Rosen (one of the
co-founders of **Sega**) and the
president of **Sega Japan**,
Hayao Nakayama, arranged a
management buyout
of Sega Japan from
Gulf and Western.
Sega re-entered the
arcade market in
1984 and in 1985-86
released **Hang-On** and
Out Run video games.

Hang-On

Sega was also selling home video game consoles at this time. They released the 16-bit **Genesis** in the early 1990s. **Sonic the Hedgehog** was their flagship game, which helped the Genesis to outsell the **Super Nintendo** from 1995–1997. In 1994 Sega bought pinball manufacturer **Data East** who got their start in 1985 when they purchased the pinball division of **Stern Electronics**. Data East made pinball machines from 1987 to 1994. Their most popular games were **Lethal Weapon 3** and **Star Wars**, both released in 1992. Sega renamed Data East's pinball division, **Sega Pinball**.

Machine or Table?

Is it called a **pinball machine** or **pinball table**?

The name “table” is popular around **Europe**. The 1969 song “**Pinball Wizard**” by **British** band **The Who** included the lyric “Even on my favorite **table**, he can beat my best.”

Table is also a commonly used term used by **virtual pinball** fans around the world. In **Australia** many people call pinball games **Pinnies**. Quite a few countries including **Sweden** call pinball – **flipper** or **flipperspel**, which translates to “pinball machine.” In the **USA** machine is the most popular term, but there is no single correct term for pinball games.
